"Well" means a well sunk / diffied / bored for the search or abstraction of water by a person or persons for carrying out scientific investigations, exploration, development or management work for the survey and assessment of water resources or for providing water, and includes open well, dug well, bore well, dug cum bore well, tube well and collector well

"Work of Water Supply" means the construction, alteration, extension, disconnection, removal, maintenance, repair, renewal or cleaning of any pipe or fitting of any water service communicating or intended to communicatu directly or indirectly with any water main of the Agency.

### PART - II APPLICATION AND GENERAL PROVISIONS

#### Existing Water Services -

Any water connection with or through the water main transferred to the Agency under the Act and tawfully existing on the date on which these regulations come into force shall be deemed to have been made under these regulations subject to the provisions herein contained

Application for Installation -

- (a) No person shall carry out any water supply installation work or make, cause or permit any private connection pipe to connect directly or indirectly to any new or existing building or in any other premises and connect the same with the Agency's main without first obtaining permission from the Agency
  - (b) Application for a new connection shall be submitted on the prescribed form along with copy of CNIC and evidence of Ownership. The application form can be obtained from any office of the Water and Sanitation Agency on payment of the appropriate fee
  - (c) A new water connection shall be allowed only on the request of or with the approval of the owner of the properly.
  - (d) If ownership lies with any Trust, the connection shall be made only with the permission of the Trust provided that a tenant or such other person occupying the premises or a part of the premises not owned by them may apply for a domestic supply of water with the approval of the owner but such connection will always be sanctioned in name of the owner. Upon transfer of legal ownership of the property, the responsibility lies with the new owner to intimate WASA in order to change the name of the consumer.
  - (e) Water connection shall not be sanctioned if ownership of property is disputed.
  - False or Incorrect Description in the Application

In case the entries made in the application or documents attached with it are found faise or incorrect at a later stage, WASA has the right to disconnect the water connection without any notice and confiscale the security amount deposited by the consumer. If there are any further dues payable by the consumer, he will have to clear the same in any case. The facility of water supply shall be resumed only after submission of correct information / description of particulars in accordance with these regulations.

وربه بالمراجد المناعلة الأفاء الدحادة عناشا وعدادة المناهر بالمراهد والمراهد

- Deposit of Plans Parker and the Contract e and the section of that an The consumer when required shall deposit with the application request two copies of as-built plans and sections clearly and Indelibly drawn on a durable material (to a scale of not less than one inch to eight feet which shall be clearly marked on each drawing) which shall show thereon every floor of the building in connection with which such water supply installation is to be used. The position, form, level and arrangements of several parts of such buildings shall be shown including proposed size and measurements of the pipe lines to be laid, stop valves, cisterns, sink taps, hot water boilers and all other fittings to which a supply of water line is to begin or from which a supply is to till taken
- Connection Regularment -
- All new connections shall be sanctioned as metered.
- The connection may not be given unless following conditions are fulfilled:
- Adequate drainage facilities are provided to the satisfaction of the Engineer. A witten consent of the owner giving his Computerized National Identity Gard (CHIC) issued by the Government of Polistan are accompanied by the application for water connection has been produced.
- A deposit sufficient to cover the following items has been made by the applicant or owner as specified by the Agency
- Connection fee,
- Cost of fixing meter and main stop valve;
- Security deposit,
- fregularization Fee (in case of illegal connection)
- Any other charges as per tarill
- The deposit as per clause (iii) shall be in accordance with the scale which may from time to lime be fixed by the Agency.

For new water connection, construction of ground water tank is mandatory, For houses up to 150 sqyd stoel, fiber glass or plastic tanks can be keption surface. Water connection from the Agency's water main will be made directly with this tank. Water from the tank may be pumped to roof tank. Previously sanctioned connection should have this arrangement by the end of year

### Inspection of Premises -

Presentation of the new connection application shall be deemed to authorize the Engineer to enter the premises after reasonable notice and to examine and test the applicant's pipes and fittings with which the connection is to be made and the drains, water closets, receptacles and talrines into which water received is to be discharged and also for reading meters, inspecting and testing any apparatus belonging to the Agency on the consumer's pre:nises when water connection is provided

## 10. Approval of Application -

The Engineer shall within len days of the deposit of the application and such plans and sections as may be required, inform to writing the applicant as to whether the application, plans and sections are approved or not

## 11. Alteration to Application -

The Engineer may direct an applicant to make alterations or improvements which appear to be necessary or destrable and the applicant shall comply and resubmit the plans and sections accordingly.

## 12. Service Connection -

- (a) In case the aforesaid application is accepted by the Engineer, he shall thereupon cause the system of water pipes in the applicant's premises to be connected with the Agency water main by its own staff/contractor by a connecting pipe and appropriate water fittings of approved material extended from such water main to the terminal point of the applicant's water piping system which may be outside or inside the applicant's premises and therefore levy charges in accordance with the prescribed rate.
- (b) No connection shall be made to the public mains until the estimated cost of making the connection has been deposited with the Agency and all the internal water fittings requisite for the supply of water have been erected and completed in accordance with any requirement.

## Water Use for Other than Agreed Purpose -

The consumer is obliged to use water only for the purpose for which the connection was originally obtained as per agreement. For any other purpose the consumer shall have to seek written permission of the Engineer.

14. Permission of Water Use outside the Sanctioned property -

The consumer shall not permit the use of water by a neighbor or any person for outside the property with the water connection sanctioned. In case of violation of this rule, the consumer shall be responsible to pay all the costs of illegal use of water it may also result in disconnection of the water supply to the consumer

## 15. Separate Connection -

In the event of a consumer requiring a separate water connection for separate house or portion of the same property, the Engineer may permit a supply of water through common feeding pipes subject to the condition that:-

The service shall be maintained to the requirement of thoses regulation; and

The owner shall not object to the tapping of the femule for giving connection to the applicant, provided that the number and particulars of the services do not exceed following unless otherwise approved by the Engineer
